

PROJECT UPDATE

IARWC
ILLINOIS ALLUVIAL REGIONAL WATER COMPANY

Communication between landowners and the Alluvial board has resulted in an increase in compensation values as follows. Please note, the rate increase applies to all easements (signed or unsigned). The per acre value has increased approximately 50% and the crop damage value has increased approximately 45%.

Alluvial's goal is to provide clean, safe aquifer water to all customers at a price determined by the customer's board representative. Currently, failure of water availability is imminent for a member. Each day is another day the community must overcome their failing water system. It is paramount to secure the water line routing in a timely fashion! Your cooperation will jump start the solution.

Upcoming Public Meetings

October 17th
6:00pm

MJM Electric Cooperative
18300 Shipman Rd.
Carlinville, IL 62626
